

How to Use Snap Hooks

Use Nylon Snap Hooks to secure your flag to your flagpole.

Step 1

Place halyard between thumb and forefinger to form a loop.

Step 2

Place loop through snap hook eye and push until loop reaches the end of the snap hook.

Step 3

Bring loop over snap end of hook and fold back toward halyard.

Flag Mounting Instructions:

Find the center of the halyard and attach the lower snap hook first.

Then install the upper snap hook-making sure the distance between hooks matches the distance between the grommets on your flag.

Secure the snap hooks through the flag grommets and adjust as necessary so that the flag is stretched tightly along the halyard.

Step 4

Bring loop over snap end of hook and fold back toward halyard.
